The Wutherich & Co. Composite was down 3.2% in August. This compares with the S&P 500, down 6.0%, the DJIA down 5.8%, the NASDAQ down 6.5%, the S&P/TSX down 4.0%, while the BMO Small Cap Index was down 2.5%.

Markets continue to be spooked by macro-economic factors. This has brought stock prices down considerably over the last several weeks. All this while we head into what is traditionally the weakest time of year for financial market performance. The weakness has transmitted itself to our portfolio. We feel that most of our stocks are reasonably priced, and in some cases, outright cheap. While periods like this hurt in the short-term, they usually provide excellent long-term opportunities. Consequently, we are topping-up existing names and incorporating new ones while constantly checking our weaker stories for long-term viability.

The following table illustrates the performance of the Wutherich & Co. Composite to the present:

Wutherich & Co. Factsheet

Company Objective

Our goal is to seek prosperity for our clients through participation in stable, growing companies in North America, led by strong management teams that we consider our partners for the next five or more years.

Investment Philosophy

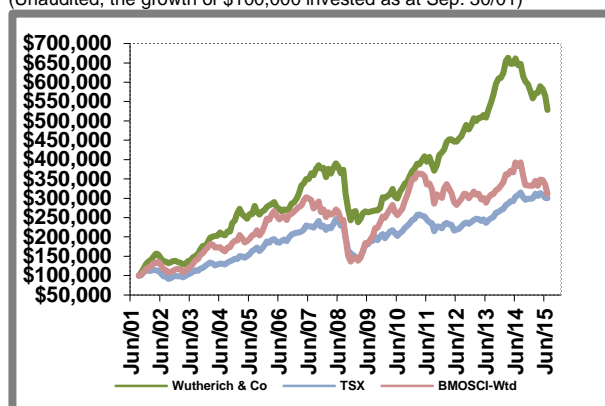

Our style can be described as concentrated, disciplined, long-term growth stock investing. The focus is on established companies that generally have a demonstrated track record in revenue, cash flow or earnings per share growth, with strong managements and solid balance sheets. The current emphasis in the portfolio is on the equity of small to medium capitalization companies, defined roughly as \$50 million to \$5 billion in market capitalization. The portfolio may include large capitalization companies if the right elements are there. Stocks are bought with a keen eye to valuation, so you're not likely to find many high multiple stocks here. The portfolio will likely maintain a significant percentage in foreign securities, providing exposure to investment returns outside of Canada.

*The Wutherich & Co. performance shown here is of a composite which combines the performance of all of the accounts managed by Wutherich & Co. that have been invested according to the Wutherich & Co. Portfolio throughout their history. These accounts vary greatly in the size of assets that they contain and whether or not fees have been deducted directly from the accounts during their history. BMOSCI-wtd = BMO Small Cap Index, Total Return, weighted. This index is currently the most comparable to the Wutherich & Co. portfolio due to its average market capitalization, though it may differ greatly in its sector weightings; TSX = S&P/TSX Total Return Index.
