Monthly Message

The Wutherich & Co. Composite was down 2.8% in November. This compares with the S&P/TSX up 0.5%, the BMO Small Cap Index flat at 0.0%. We have removed the U.S. indexes as they provide little relevance for comparison.

While most of our companies reported good or great quarterly results in November, a few reported disappointing numbers. Market reaction to this latter group was very negative, bringing our overall portfolio down during the month. Frankly, the numbers weren't all that bad and most of these names should recover over time. Even with the companies reporting positive results, stock price reactions were neutral to negative. For example, Badger Daylighting and Parkland Fuel were both off 10% after reporting good numbers. Ultimately, the strong fundamentals that most of our companies possess should drive good returns over the long-term.

We would like to thank everyone who was at our Annual Update at the Mount Stephen Hotel. Attendance was terrific and great questions were posed by all.

Lastly, we would like to wish a Merry Christmas and Happy Holidays to all of our clients and friends.

Wutherich & Co. Factsheet

Company Objective

Our goal is to seek prosperity for our clients through participation in stable, growing companies in North America, led by strong management teams that we consider our partners for the next five or more years.

Investment Philosophy

Our style can be described as concentrated, disciplined, long-term growth stock investing. The focus is on established companies that generally have a demonstrated track record in revenue, cash flow or earnings per share growth, with strong managements and solid balance sheets. The current emphasis in the portfolio is on the equity of small to medium capitalization companies, defined roughly as \$50 million to \$5 billion in market capitalization. The portfolio may include large capitalization companies if the right elements are there. Stocks are bought with a keen eye to valuation, so you're not likely to find many high multiple stocks here. The portfolio will likely maintain a significant percentage in foreign securities, providing exposure to investment returns outside of Canada.

*The Wutherich & Co. performance shown here (using the Time Weighted Rate of Return method) is of a composite which combines the performance of all of the accounts managed by Wutherich & Co. that have been invested according to the Wutherich & Co. Portfolio throughout their history. These accounts vary greatly in the size of assets that they contain and whether or not fees have been deducted directly from the accounts during their history. BMO SSCI-wtd = BMO Small Cap Index, Total Return, weighted. This index is currently the most comparable to the Wutherich & Co. portfolio due to its average market capitalization, though it may differ greatly in its sector weightings; TSX = S&P/TSX Total Return Index. Due to its large capitalization nature and substantially different sector weightings, this index may not be considered comparable to the Wutherich & Co. Portfolio.
