For March, the Wutherich & Co. Composite was down 4.4%.

Trump Chaos 2.0 plays on. During February and March, we reviewed all our names in detail as they reported their most recent quarters. While some are struggling, the bulk of them are doing very well, with strong fundamentals and solid outlooks. While everyone has some level of concern with His Trumpness, most are getting on with business. In general, many of our names have little direct exposure to Trump Chaos. It is more the knock-on effects of his actions that could have secondary effects on them.

Of course, we will monitor all our names extremely closely as we have done with every crisis. We'll make any necessary adjustments to the portfolio, as circumstances warrant. That being said, we are very optimistic that most of our companies will survive this crisis, forming the foundation for good long-term returns.

## Company Objective

Our goal is to seek prosperity for our clients through participation in stable, growing companies in North America, led by strong management teams that we consider our partners for the next five or more years.

## Investment Philosophy

Our style can be described as concentrated, disciplined, long-term growth stock investing. The focus is on established companies that generally have a demonstrated track record in revenue, cash flow or earnings per share growth, with strong managements and solid balance sheets. The current emphasis in the portfolio is on the equity of small to medium capitalization companies, defined roughly as \$50 million to \$5 billion in market capitalization. The portfolio may include large capitalization companies if the right elements are there. Stocks are bought with a keen eye to valuation, so you're not likely to find many high multiple stocks here. The portfolio will likely maintain a significant percentage in foreign securities, providing exposure to investment returns outside of Canada.

\*The Wutherich & Co. performance shown here (using the Time Weighted Rate of Return method) is of a composite which combines the performance of all the accounts managed by Wutherich & Co. that have been invested according to the Wutherich & Co. Portfolio throughout their history. These accounts vary greatly in the size of assets that they contain and whether or not fees have been deducted directly from the accounts during their history. TSX-TR = S&P/TSX Total Return Index. Due to its large capitalization nature and substantially different sector weightings, this index may not be considered comparable to the Wutherich & Co. Portfolio. As the Wutherich & Co. portfolio does not compare directly with any known indices, we show the S&P/TSX index only as a reference for the overall Canadian stock market and should not be considered as a direct comparison to what we do.
